Graphene far infrared heating technology

Far infrared rays have a resonance effect on the cells, quickly relieve eye fatigue, and protect skin around the eyes

The image shows a woman's face wearing a large, wrap-around eye mask. The mask has a pink mesh strap and a lens area with a gradient from orange to red. The background is a light grey panel with three icons and their corresponding text.

Cell molecular resonance

Deep absorption of thermal energy

Relieves eye fatigue and improve sleep quality
