PREMIUM DESIGN

A fresh new dual fan design, VENTUS proudly displays its industrial shapes in neutral colors to fit any build.

TORX FAN 2.0

Using two of the award-winning TORX Fans 2.0, MSI VENTUS graphics cards provide years of top-notch cooling performance.

Dispersion Fan Blade
has a steeper curved blade which accelerates the airflow, increasing its effectiveness.

Traditional Fan Blade
pushes down a steady airflow to the massive heatsink below.

WE'VE GOT YOUR BACK

A sturdy backplate helps to strengthen the graphics card and complements the design to look even better.

THERMAL PADDING

Ample amounts of thermal pads are used to allow various components to transfer heat to the heatsink for better cooling.
