

MicroBT Shenma M30S 100T 102T 104T 106T 108T 110T Bitcoin SHA256 ASIC Mining Machine

Miner is based on 8nm Samsung Asic technology.

The new Whatsminer M30S ASIC miner produces ~106 TH/S SHA-256 hash power and consumes 3286W.

IT comes with a 3800W -220V - 240V power supply built into the top, removing the 9 pin

cable and making it easier to plug into an outlet.

The M30S is about the same size as our flagship miner, the M20s. The main size difference is the lower height of the PSU.

The ITS built-in fan system generates peak hash power while keeping the computer cool.
